Checkpoint 1 for Project 2:

The primary goal of the checkpoint is to make sure that you have (or will have soon) the equipment you need and are making progress. It also gives me me a chance to give you feedback so you can adjust your project goals if needed.

Please include the following information:

1) Update on the description and goals of you project. This can be an update on the proposal text.

2) Update on the project plan: tasks and milestones, who will be responsible for each task, update on equipment needs and status.

3) Progress so far, e.g., setting up hardware, installing software, measurements, preliminary results, etc.
